MEDIAPIE INVEW

Mediapie is an anonymous decentralized social project that allows users to create and send non pluralized but authorized content seamlessly on the Mediapie platform. Our robot APP and website will allow you to store your Photos and videos files de-centrally and securely in a single platform; built-in an anonymously management will allow you to decide if you want to keep your photos private or if you want to sell photo rights to others in exchange for MNFT tokens. We will Implement a section that will occupy 5mins (max) video and series of your pictures, project proposal and general talent hunt category.

Right of ownership with an anonymous user's water link will be created and unaltered but will remain traceable on our own mother blockchain in the nearest future. Mediapie.explorer/waterlink which interested client can easily check users' content via their public water link address.

While we are not in competition with steemit, we strongly believe that we are more equipped with interesting features than an annoying and complicated content upvoting for a reward. This we can achieve by a driven community of mind-likes.

1

OUR OBJECTIVE

Our objective with Mediapie token and platform is to decentralize the internet opportunities by providing a workable platform for your skills. We also aim to integrate a commutable ledger bookings copyright for your activities after our main net.

OUR MISSION

Our objective with Mediapie token and platform is to decentralize the internet opportunities by providing a workable platform for your skills. We also aim to integrate a commutable ledger bookings copyright for your activities after our main net.

2

EXPECTED SOLUTIONS?

Our mission for launching Mediapie is to solve many issues with mainstream, centralized social media and correct the conventional social media anomalies through.

- Full integration of MNFT token against the annoying ads on conventional or tradition social medias
- An avatar and water link user platform
- Content acceptability is solely in the hands of the community
- Achieves reliability of data with blockchain technology with lower costs than ever before
- Decentralized of contents, photos and videos
- Give every photo or video a monetized value which will be treacable on the blockchain
- Manage licenses and rights of photos or videos via an explorer waterlink
- Talent and social tasks rewards with MNFT tokens
- Meaningful short video be it comedy skits, historic, event short video that is capable of generating traffic to accommodate different languages.
- Debug notification reward system
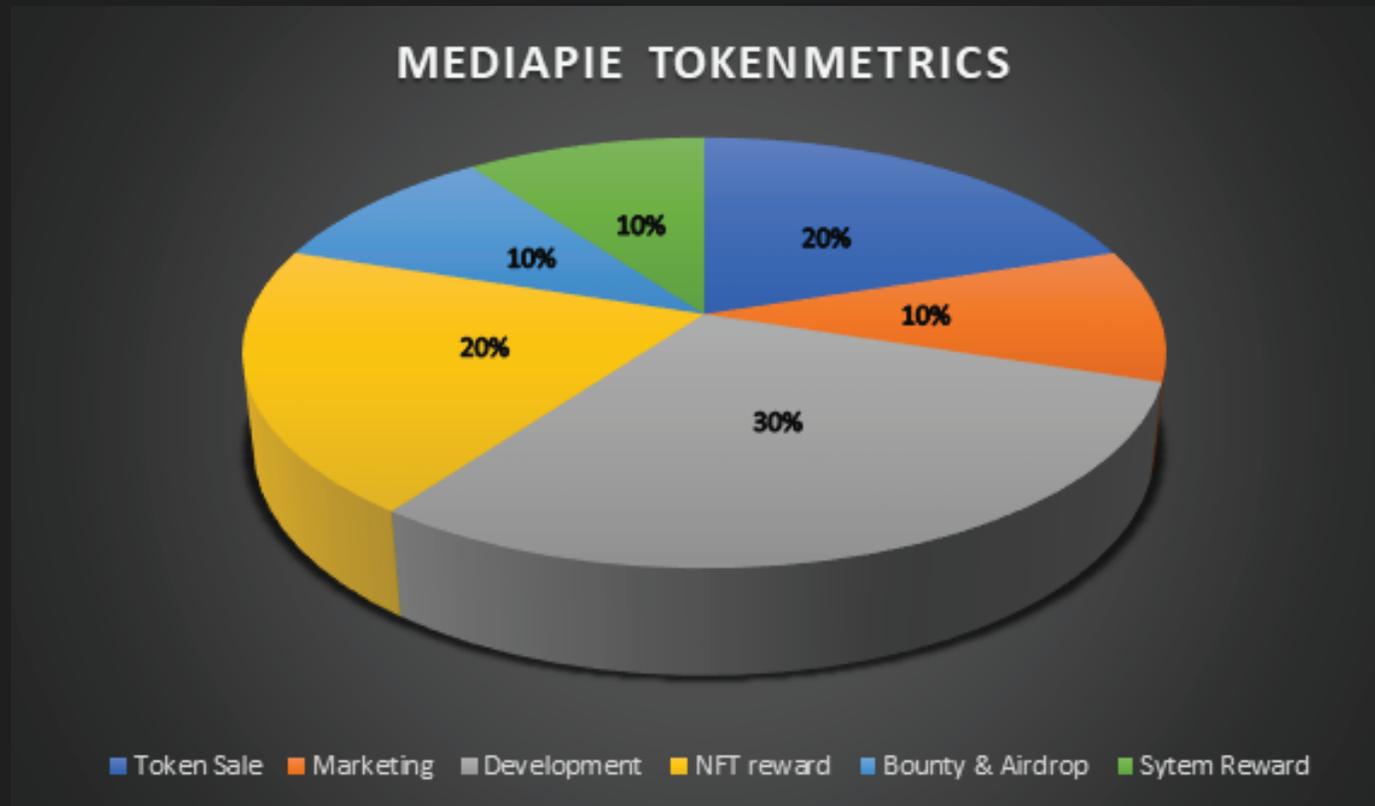

③

MEDIAPIE DEFLATIONARY

While the project is a core value for NFT and defi related, we also take auto price control seriously without creating unnecessary hypes, most importantly while development is ongoing. To curb inflation, we have deployed Mediapie token to Share, Burn and finance the liquidity aspect of the platform by charging of 5%

We therefore implore all pancake or similar DEX platform users to set their slippage slightly above 5%.

HOW TO CREATE AN NFT FROM YOUR CUSTOM-MADE PICTURES & VIDEOS;

1. Visit and register on mediapienft.com
2. Create your own NFTs from your personalized made pictures and videos
3. Obtain a customized watermark on your picture/video
4. Upload your picture/video on the provided mediapienft platform and click on "made public" icon that will be provided on the platform
5. Attract more lovers, admirers, reposts and comments to your posted media property.
6. Decide on either to give offer or receiver on your media property post on mediapienft public domain.
7. If you are selling – you will receive offer on you media property and if you want to buy: you will give offer on a particular attracted media.
8. You can also right click or double click on the particular image to manually set the custom price for the particular image you want to sell or buy.
9. Start earning in both BNB and MNFT for every media property you sell on MNFT platform.

MEDIAPIE TOKENMETRICS

Having the best tokenmetric is priority and hence a total of 500M token will be created and that's very last supply ever to exit with less than 40% to be in circulation for the next 3 years.

ICO ARRANGEMENT

In order to make this project happen and give it the best chance of success, input from the community is essential in order to improve the idea and let the platform grow. Opinions and collaboration from all parties sharing the same belief with MNFT is the key to success. The MNFT team needs support from the public culminating in an ICO which will be divided into 2 phases. It will begin with the early staunch supporter phase and the public offering will take place immediately afterwards, leftover sale, all within the space of 30days. Details of the phases can be seen below.

We are going to launch the project ICO in 2 stages depending on how soon we are able to accomplish them with a total of 15M token across the 3 stages.

STAGE 1

Staunch supporter stage; this is otherwise known as presale- A total 5M token will be available on presale which shall only run for 72 hrs. at 0.055$ with 25% referral bonus.

STAGE 2

Public sale: A total of 10M token will be available at 0.075$ which shall run for 10 days with 20% referral bonus.
All unsold token will be burned
Minimum: $50

8

FUND FINANCES AND ALLOCATION

Minimum Threshold - The minimum threshold is $500,000 this amount will cover the costs of running Mediapie project from Q4 2021- Q42022

Hard Cap – In case the hard is reached, we will accelerate and integrate our products and platform and main net into Q2 2022 Road Map. Also, marketing will be at its peak.
